

## Remote Rod Handler

- Automatic Rod Handling System (ARHS) provides a convenience of operation while reducing the need for additional rig hands, thus making the drilling function more reliable and cost effective.
- Custom designed to attach to the rear of drill—exact fit every time.
- Operation can be monitored from remote mounted cameras, allowing the driller to observe all functions from one location

### Specifications:

ARHS is self-contained and is powered by an 85 HP diesel engine.

Self-contained hydraulic system

- Range 2 capacity
- Flush joint or EU drill rods
- Lifting capacity — 5,000 lbs.
- Average trip speed 1,000 to 1,200 FPM.

### Dimensions:

- Weight — 26,000 lbs.
- Length — 30 ft.
- Width — 8 ft.
- Height — 8 ft. 9 in.

### Options may include:

Pullback winch for tool handling, BOP holder, hammer holder, slips and elevator holder, lighting package, custom designed limit and safety switches. Locally manufactured and distributed.
